# De novo Biosynthesis of Corrinoids

**Bacteria**  
(n = 56,902)

**Archaea**  
(n = 1,362)

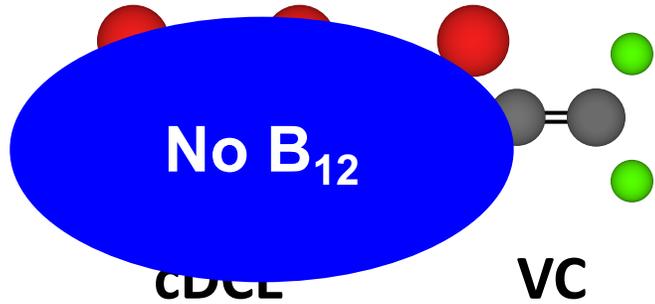

*Dehalococcoides mccartyi*  
→ Corrinoid auxotroph

*Geobacter lovleyi*  
→ Corrinoid prototroph

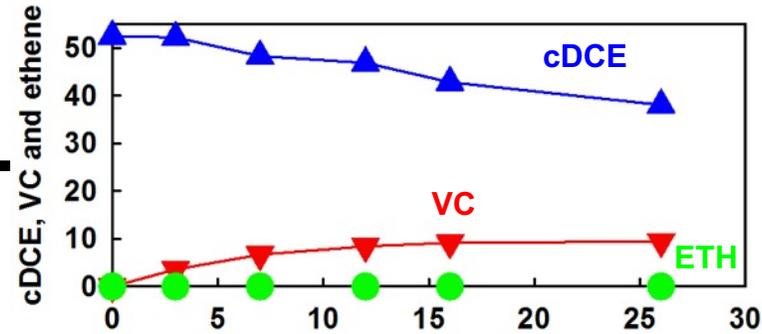

# Dhc & Dhgm: Strict Requirement for Corrinoid

Dhc strain BAV1

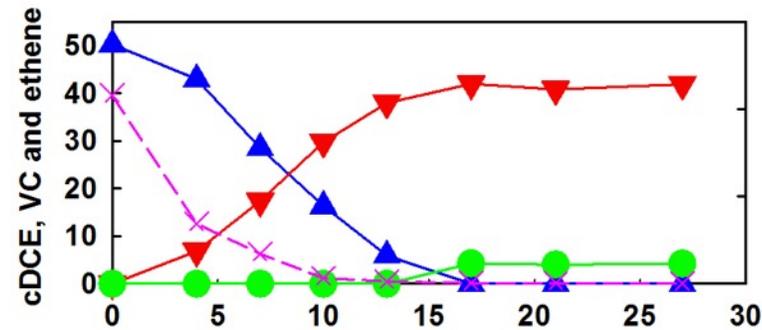

**Limited B<sub>12</sub>  
[1 µg/L]**

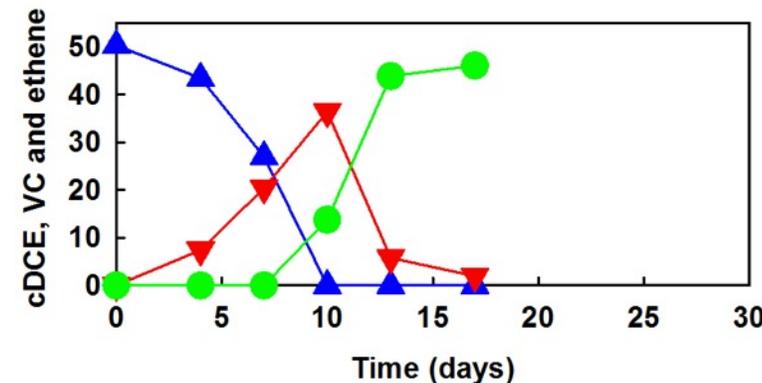

**Sufficient B<sub>12</sub>  
[25 µg/L]**

**No**   
**dechlorination**

  
**VC stall**

**Complete  
Dechlorination  
(Detoxification)**

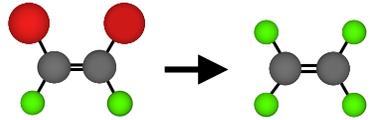

# Specific Aims

---

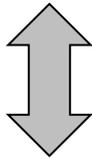

- **Aim 1:** Explore the specific cobamide requirements of organohalide-respiring *Dhc* relevant for detoxification of chlorinated ethenes
- **Aim 2:** Demonstrate that geochemical conditions affect the specific cobamide pool, and hence *Dhc* activity
- **Aim 3:** Identify community and *Dhc* biomarkers that indicate when cobamide and/or lower base bioavailability limit *Dhc* reductive dechlorination activity

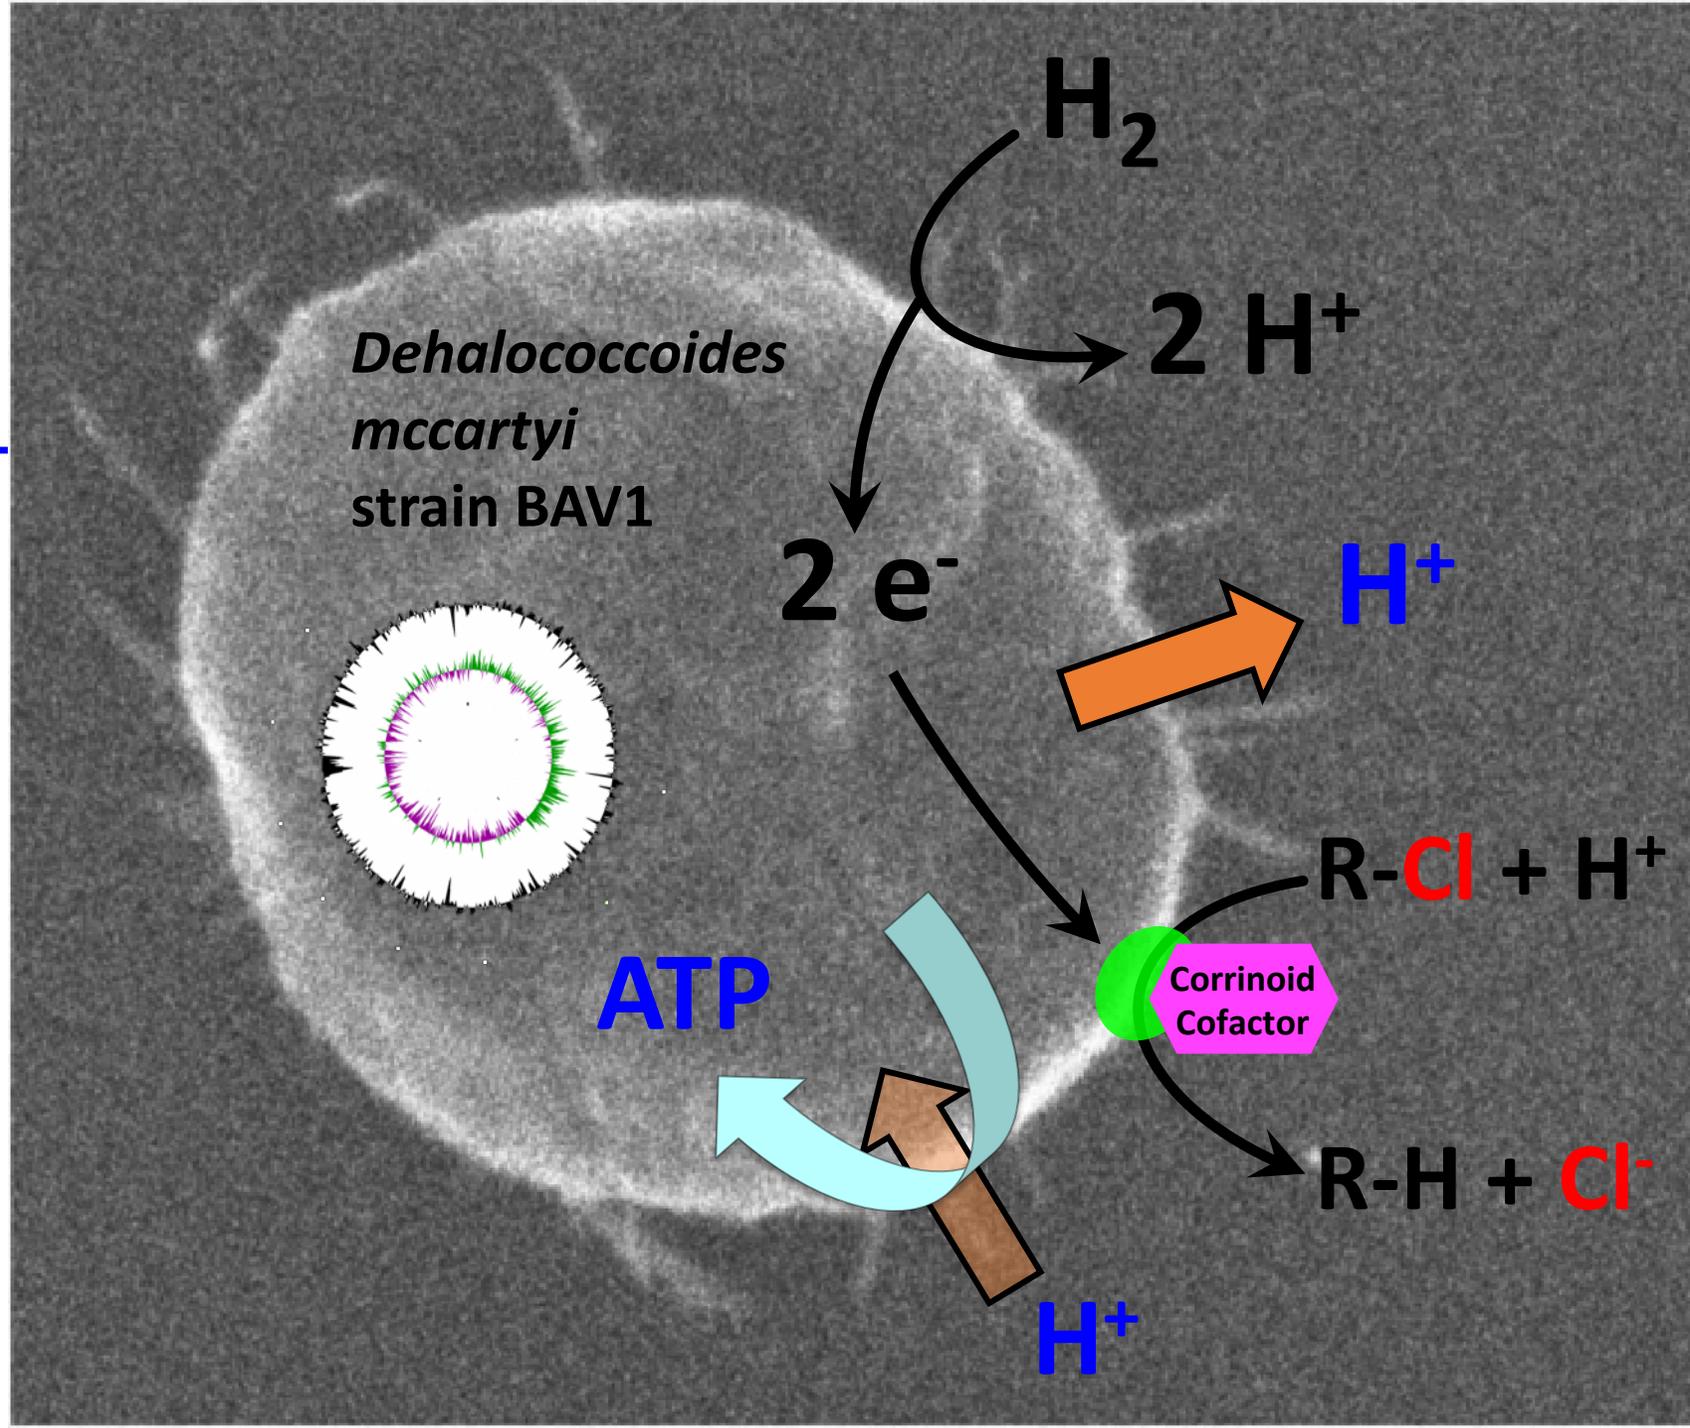

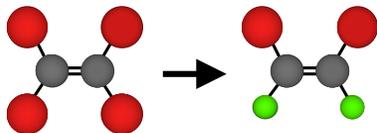

# Simplified Model of Organohalide Respiration

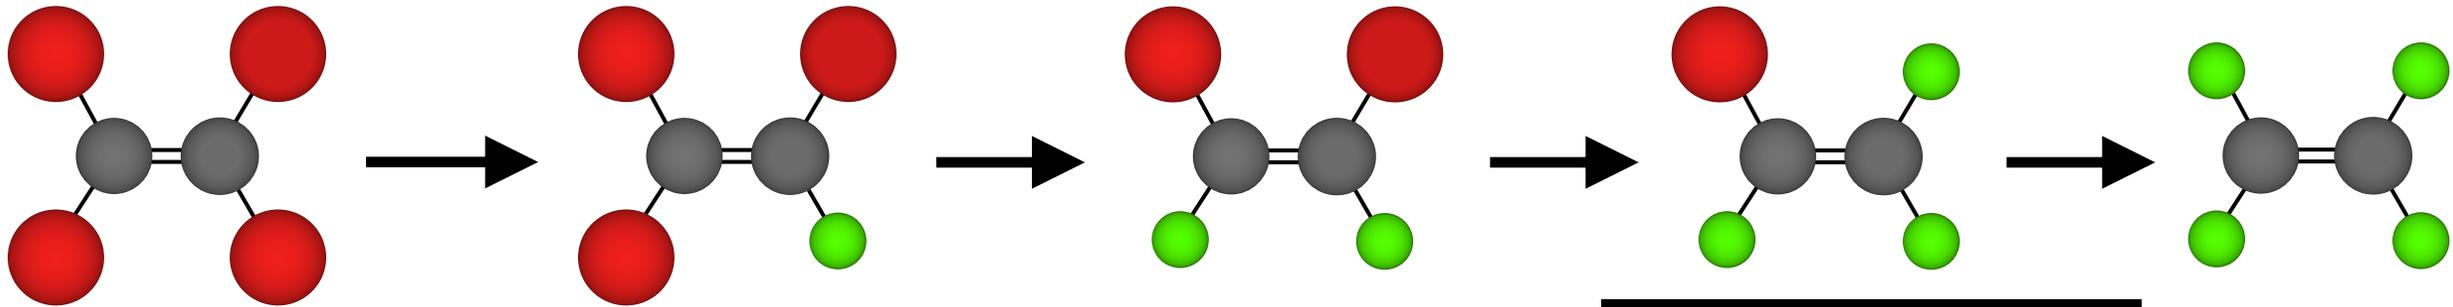

*Dehalococcoides mccartyi*  
→ Corrinoid auxotroph

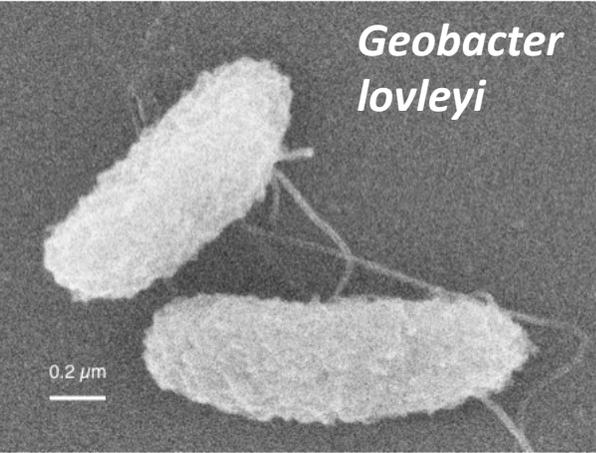

*Geobacter lovleyi*  
→ Corrinoid prototroph

# Who Supplies Corrinoid to *Dhc* and *Dhgm*?

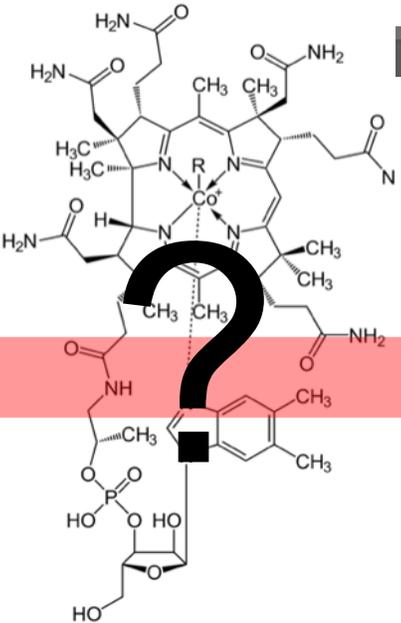

*Dehalococcoides mccartyi*

*Geobacter lovleyi*

# Adenosylcobalamin Biosynthesis

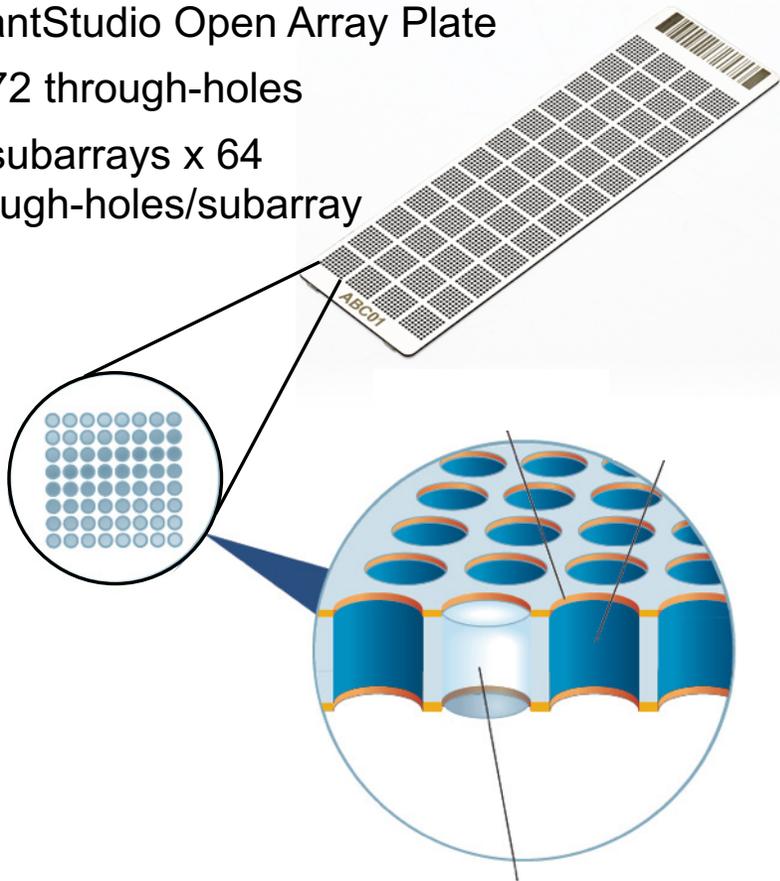

# High-Throughput qPCR

- **Monitor many biomarker genes simultaneously**

QuantStudio Open Array Plate

3,072 through-holes

48 subarrays x 64 through-holes/subarray

- Scalable platform (224x12; 112x24; 56x48)
- Cost per reaction reduced from \$3.0 to \$0.30
- Four plates can be cycled simultaneously, producing up to 12,288 qPCR data points per run

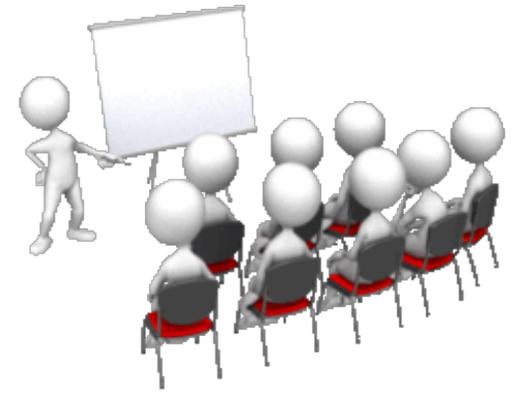

Robot reduces pipetting errors

Kara Murdoch et al. 2019. In Preparation

# Take Home Messages

---

- Corrinoids are essential for most organisms
- Corrinoid-auxotrophic OHRBs (e.g., *Dhc*, *Dhgm*) are ideal systems to study corrinoid effects on metabolism
- Corrinoid quantity (flux) affects dechlorination activity
- Corrinoid type (lower base) determines reductive dechlorination rates and end points (i.e., function) in *Dhc*
- Geochemistry affects corrinoid pool
- Purine is a naturally occurring lower base
- New avenues to manipulate microbial metabolism (function, ecology → biotechnology, medicine)
